

Cognitive Lecture Series, Fall 2005

FIRST-YEAR PROJECT PRESENTATIONS

August 26 Elizabeth Hamann, University of Illinois
The short term effects of cognitive engagement on subsequent mental functioning

September 2 Charlene Lee, University of Illinois
An event-related potential study on nouns, verbs, and noun-verb homonymy

September 9 Priya Kandhadai, University of Illinois
Hemispheric differences in sensitivity to lexical and semantic information: an electrophysiological investigation

September 16 Gary Oppenheim, University of Illinois
Voices in your head

September 23 Jun Saiki, Kyoto University
Selective and distributed attention and memory in visual cognition

NEW POST-DOC September 30 Chandramallika Basak, University of Illinois (Jason Barker?)
The workings of working memory

NEW FACULTY October 7 Duane Watson, University of Illinois
Understanding acoustic prominence in language production

NEW FACULTY October 14 Brian Gonsalves, University of Illinois
Does conceptual priming subserve familiarity? fMRI encoding predictors of declarative and nondeclarative memory

October 21 Jason Barker, University of Illinois at Springfield
A further look at how (and whether) transitional probabilities between words influence reading

NEW FACULTY October 28 Diane Beck, University of Illinois
Stimulus context modulates neural competition in visual cortex

NEW FACULTY November 4 Denise Cummins, University of Illinois
Why we need an evolutionary psychology

November 11 No meeting: 46th Annual Meeting of the Psychonomic Society, Toronto, ON

NEW FACULTY November 18 John Hummel, University of Illinois
Recent findings on relational category learning

November 25 Thanksgiving break

December 2 Bruce Christensen, Center for Addiction and Mental Health, University of Toronto
Visual system indicators of anomalous functional brain organization in schizophrenia

December 9 Neal Cohen, University of Illinois
The hippocampus and relational memory
